

16 Application Information

This is the description how the IC is used in its environment

Note: The following information is given as a hint for the implementation of the device only and shall not be regarded as a description or warranty of a certain functionality, condition or quality of the device.

- Please contact us for additional supportive documentation.
- For further information you may contact <http://www.infineon.com/>

Note: This following figure is a very simplified example of an application circuit. The function must be verified in the real application.

Table 27 Recommended values for parts in application diagram

Name	Value	Switching frequency range
Inductor step up	22 μ H	500 kHz
Capacitor step up	100 μ F	500 kHz
Filter inductor step down	4.7 μ H	2.2 MHz
filter capacitor step down	10 - 47 μ F	2.2 MHz
Filter inductor step down	22 μ H	400 kHz
filter capacitor step down	68 - 100 μ F	400 kHz
